Book of the Week

David Barrett McTyre

David Barrett McTyre

BEVERLY, MASSACHUSETTS, USA

Few architects would voluntarily complete construction drawings by hand, but David Barrett McTyre prefers to. He explains, “[They’re] much more enjoyable and descriptive than AutoCAD drawings. And more appropriate for the smaller scale projects that I do.”

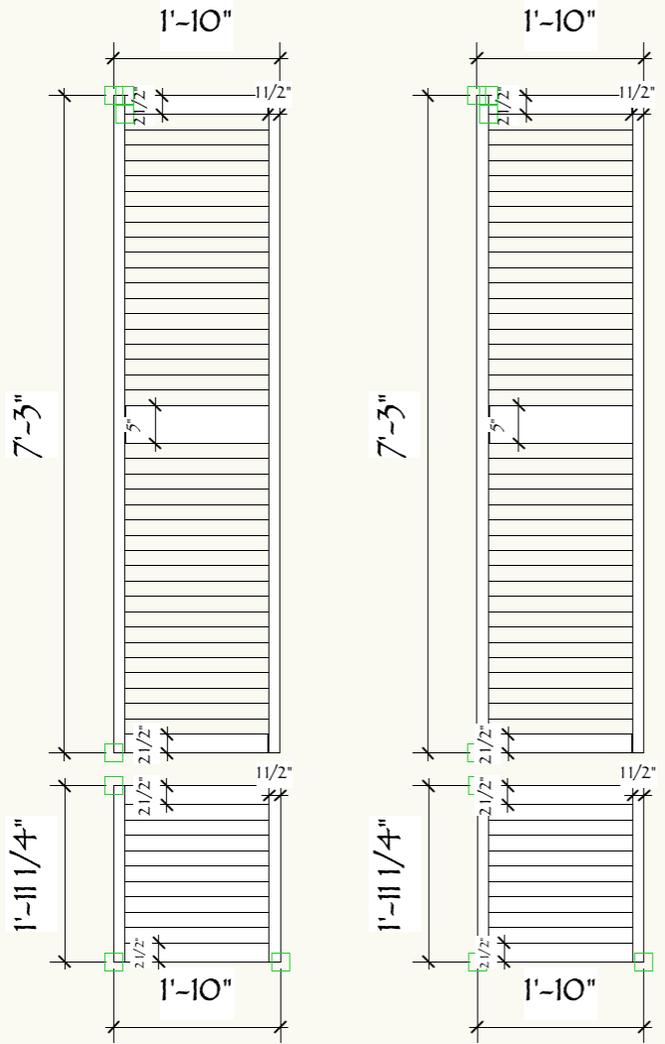

McTyre’s drawings for a new barn and chicken coop at a Mississippi farm combine, unexpectedly, the obsessive detail of working drawings with the cheerful energy of storybook illustrations. In a set of drawings for a chicken coop, McTyre depicts the wood-frame coop with conventional drafting techniques, calling out all the critical dimensions, materials, and connections required for construction. He then enlivens the page with naturalistic color and shadow, a backdrop of lawn and trees, a portrait of a farmer in a straw hat, and, at her feet, a flock of chickens. The drawings imagine a joyful life for this simple wooden structure.
